

## Resources for Knowledge about Wood and Woodworking

Here are some places on the web where you can get more information about wood and specifying veneers:

### **Architectural Woodwork Institute**

[www.awinet.org](http://www.awinet.org)

Students can join for \$20 per year, which includes a copy of the Architectural Woodwork Standards and a subscription to *Design Solutions* magazine.

### **Formwood Industries**

[www.formwood.com](http://www.formwood.com)

Formwood has a nicely organized library of veneer species as well as a Learning Center that has a glossary of veneer terms and a list of Frequently Asked Questions, in addition to other specification aids.

### **Hardwood Plywood and Veneer Association**

[www.hpva.org](http://www.hpva.org)

Use this link to get a handy checklist for specifying hardwood veneers:  
<http://www.hpva.org/products/buying/veneer.asp>

### **Herzog Veneers**

[www.veneeronline.com](http://www.veneeronline.com)

You can view their live inventory on their site as well as use the “Panel Wizard” to choose veneer species, cuts and matches to create sample panels. The “Reference” link on their homepage also has good information about veneer species, slicing, matching and figure.

### **Woodweb**

[www.woodweb.com](http://www.woodweb.com)

This site is busy, but the knowledge base provides a forum for asking and answering questions about wood and woodworking.
